

	INTEGRATED POLICY	Ref. / Rif. PA-00 Ver / Versione: 4 Date / Data: 17/02/2023 Page / Pagina: 1
---	--------------------------	---

AEROSPAZIO TECNOLOGIE SRL has implemented and documented its Quality Management System with the significant participation of its personnel, in accordance with the requirements set out by the standards *UNI EN ISO 9001:15*, *UNI EN ISO 14001:2015*, and *ISO 45001:2018*.

The company aims to formalize its commitment to pursuing customer satisfaction, environmental protection, and the health and safety of workers.

To this end, it identifies the following primary objectives for its activities:

- Full satisfaction of customer needs while respecting the expectations and rights of other stakeholders.
- Continuous improvement of management systems.
- Environmental protection and pollution prevention, including the full involvement of key suppliers.
- Commitment to eliminating hazards and reducing risks to safeguard the health and safety of all those working on behalf of the company, aiming to prevent injuries and occupational diseases.
- Respect for freedom of association and the right to collective bargaining.
- Condemnation of all illegal conduct that could conflict with physical and/or moral integrity.
- Compliance with environmental and worker health and safety regulation.

The company aims to achieve these objectives through its organization by systematically implementing:

- Quality control of the services provided, such as design, research, and experimental development in aerospace science and engineering (equipment, engines, machinery, systems, structures, plants, devices, instruments, hardware and software systems, and space and aerospace technologies).
- Staff training.
- A system of authority and responsibility communicated within the organization.
- Use of adequate resources for activity management and new, safer, more efficient, and eco-friendly technologies.
- Internal communication of the results obtained from the Integrated Management System.
- Pursuit of productivity improvement.
- Improvement of the environmental compatibility of the vehicle fleet and operational sites.
- Planning of risk prevention and protection activity.

Customer needs and expectations are met through maximum commitment in service execution activities. AEROSPAZIO TECNOLOGIE SRL commits to implementing, supporting, and periodically verifying the Integrated Policy, disseminating it to all those working in or on behalf of the company, making it available to the public, and verifying its understanding, implementation, and adequacy through tools defined in the Manuals.
